WWA 5.1.2.2 Release Note

February 20, 2002

(FR 385 / SPR 2580 / DR ~~9297~~)
Title: Standardized Hazard Menu (5.1.2 patch) - 12.15.01
Summary: Taking OS's national products list write a script to make ever WFO have the same hazard menu. This is needed to assure a proper working intersite feature.

(FR 444 / SPR 2893 / DR ~~9709~~)
Title: WWA: Tone alerted NWR messages not being created by nwr (5.1.2 patch) - 11.20.01
Summary: The use of wwa_nwr_twrs instead of nwr_twrs list will cause products to not tone and possibly not even generated.

(FR 423 / SPR 2910 / DR ~~9716~~)
Title: WWA: Wrong text/PIL for backup sites (5.1.2 patch)- 11.28.01
Summary: When attempting to followup/clear/cancel a product for a backup site, the PIL sent to the wwaServer and the product text is incorrect after clicking on "save & Create Text" button in WWA composer.

(FR 427 / SPR 2911 / DR ~~9718~~)
Title: WWA: Wrong text/PIL for current site (5.1.2 patch)- 11.28.01
Summary: If you select your own site from the site menu in the WWA composer, format a product then click on "Save & Create Text" the result will be missing text, and an incorrect PIL.

(FR 421 / SPR 2933 / DR ~~9747~~)
Title: WWA Edit WWA setup GUI (5.1.2 patch) - 11.26.01
Summary: Lockout field from making changes to Hazard type, generic name, & specific product names updated by the standardized Hazard menu through use of the WWA setup GUI. However allow the field to add local products to db through this GUI.

(FR 434 / SPR 2931 / DR 9743)
Title: WWA: WWA crashes in county map background (5.2.1)
Summary: WWA will crash after the county map background. Occurs after "Save and Create Text" is clicked. Viewing wwa error logs reveals "BadGC" error.
